

# WireLace® Spider Mum Flower Fun (replace Steps 1-5 Flower Fun Basics)

Create stunning dimensional flowers on the FunJig with WireLace, colored wire, epoxy clay and SWAROVSKI ELEMENTS.

## SPIDER MUM SUPPLIES

FunJig with 20 pegs and Flower Fun Basics Instructions (included with FunJig)  
 90 inches ( 2 1/2 yards) of 3mm WireLace (your color choice)  
 114 inches ( 9 1/2 ft) of 24 gauge enamel colored wire (match or similar colors as WireLace)

5 grams (approx) of epoxy clay (brand/color of your choice)  
 Attaching/Wearing Flower: Use magnets, pin OR create your own method.

SWAROVSKI ELEMENTS as desired or as shown with:  
 Seafoam Spider Mum: 3-Tier Crystal Button in Chrysolite, Silk, Light Amethyst, Luminous Green Art.60444P2400C F13 1028 F 238 212 391  
 Blush Spider Mum: Qty. 20 Art. 1028 PP10 White Opal Qty. 30 Art. 1028 PP15 Crystal Golden Shadow

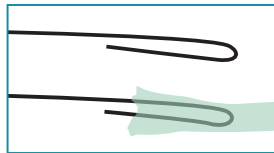

**TOOLS NEEDED:** Vinyl gloves (for mixing epoxy clay) scissors, ruler, wire cutters, Mod Podge Gloss, make-up wedge sponge to apply Mod Podge.

## FOUR things to know before starting:

- 1 Measure WireLace to make sure you have the needed amount
- 2 Keep WireLace smooth and straight - not twisted on wire.
- 3 Don't pull WireLace tight or the wire will push through when wrapped.
- 4 If you end up one petal short - it's ok - just spread out the other petals.

1 Cut 96 inches of 24 gauge wire.  
 Cut 90 inches of 3mm WireLace. Bend wire one end over 1 inch as shown. Insert through the center of WireLace extending about 3 inches on other end.

2 See **Diagram A** to arrange pegs as shown. The Spider Mum uses 22 pegs (including the start/end holding pegs) so you will need to move and reinsert 2 pegs as you make the flower. The red arrows shows the 2 pegs that you will move **after** you finish wrapping Petal Group 4 in Step 4. Place Pegs in hole positions 1 > 4 > 6 > 8 for 5 Petal groups,

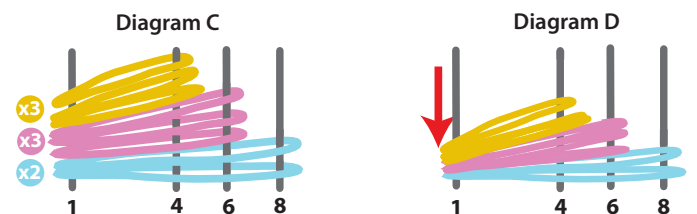

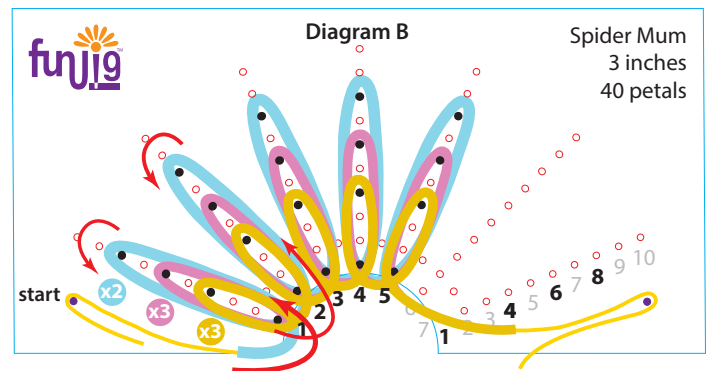

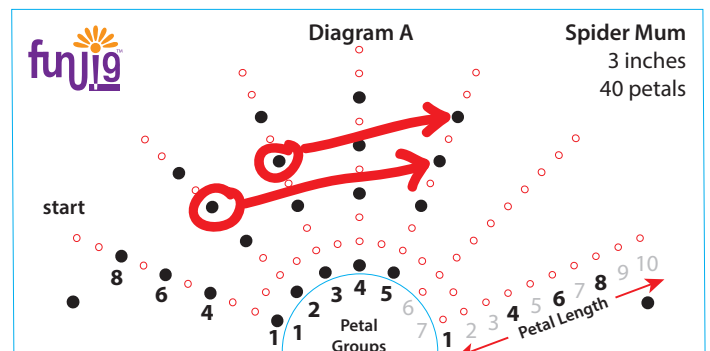

3 The Spider Mum has 40 petals divided into 5 Petal Groups. Each Petal Group has 8 petals, 3 different lengths. The different lengths are colored coded for clarity - the Spider Mum is one color.

4 **Diagram B.** Use the bent wire fed through the WireLace to wrap around the starter peg to hold in place. To keep WireLace tidy, twist 1 inch around wire before wrapping on the first peg. Wrap the longest petals first (blue) ascending to the shortest (yellow) following the direction of the red arrows. See **Diagram C** for side view of layering. Complete each petal group before moving to the next petal group.

**IMPORTANT:** After wrapping the petals in Group 4 move two pegs to Group 5 red arrows **Diagram A**. After last peg twist remaining WireLace around wire to keep tidy. Wrap end wire around end peg to hold in place.

5 **Diagram D** - Condense/press down the petals on each group before proceeding to the next step to prepare for wrapping the petals together. Follow Steps 6-16 of Flower Fun Basics included with your FunJig, changing crystals to samples show or as desired.

Use these 5 Steps for Spider Mum Flower Fun and the Flower Fun Basics Instructions (included with FunJig) for Steps 6-16 to complete.

Use Flower Fun Basics Steps 6-16 to Complete, except

➔ **Modify Step 11:** To create the long slender petals of the Spider Mum gently squeeze each petal across the middle then curve up and adjust as desired. Always pull from the base to keep wire from pushing thru tip.
