

Butterfly - small & large

Graceful butterfly clasps in two complimentary sizes that work interchangeably. Each Butterfly needs only one navette crystal to glue-in and bring them to life.

Connectors are the same size so you can link a bracelet and necklace together for an extended length or join several bracelets to make a necklace.

Select from our color assortment of Swarovski® crystal. Buy only what you need or keep several crystal colors and clasps on hand so you can design on-the-fly.

Available in two highly polished nickel-free plated finishes: gold and rhodium.

Ideas to inspire...

Butterfly connectors are interchangeable. Link a bracelet and necklace together for a longer length.

Clasp style: Butterfly
 Skill level: easy
 Time approx: 5 minutes
 Crystals to glue: 1

Sizes approx:
 • small 19x13mm
 • large 20x18mm
 Nickel-free finishes:
 • rhodium plate
 • gold plate

SIZE	QTY	SIZE	SHAPE	SWAROVSKI® STYLE #
small	1	6X3mm	navette	4200
large	1	10x5mm	navette	4200

Tools needed:

- jewelers tweezers
- 2-part all purpose 5-minute epoxy, clear drying

How to:

- Mix glue per instructions. *Before you glue, remove the clasp connector.*
- Apply glue to the recessed area where crystal sits (not on crystal).
- Set in crystal and adjust to make sure crystal is level.

Helpful hints:

- Use museum putty to hold clasp in place. And, instead of tweezers, try using a toothpick with a tiny bit of museum putty rolled on one tip. It will stick to the crystal so you can position it, releases easily and leaves no residue.
- If you get glue on the crystals or clasp, dampen (squeeze out excess) a Q-tip in isopropyl alcohol to remove. This only works if the glue has not set.
