

**15** OPTIONAL: Create a pick-up stick for positioning and gluing crystals with a toothpick and a tiny bit of museum putty rolled on tip.

**16** Pour equal amounts of 2-part epoxy and mix together. **HELPFUL TIP:** Mix with toothpick on sticky notepad for easy clean-up.

**17** Before adding glue, check to make sure crimp will fit inside endcap. Fill endcap 1/2 full with epoxy. Lightly dip tip of necklace ends into glue.

**18** Slide/push endcap over crimp and have loop opening face down. (Seedbeads on top loop opening on bottom.)

**19** Remove tongue. Spread thin, even layer of glue in recessed area avoiding hole at bottom. Do not flood with glue as it will seep into hole and cause a blockage.

**20** Use toothpick with putty to pick-up #9 teardrop crystal. (Or you can use tweezers, etc.).

**21** Lower into position. With finger gently push crystal down to be sure it is 'seated'. Make sure crystal is even. *If needed:* use Isopropyl alcohol to remove any glue residue before it dries.

**22** Open ring slightly to attach clasp and squeeze to close. Enjoy!

**KIT INCLUDES:** (some items may have extras)

- 1** 36" WireLace™
- 2** 2 bell endcaps
- 3** 18" Italian glass seedbeads
- 4** 30" wire Beadalon® .018 Silver Plated 19 Strand
- 5** 36 Swarovski® 6200 6mm
- 6** 38 Swarovski® 6301 6mm
- 7,8** 6 Swarovski® 8115 or 8015 14mm
- 9** 1 Swarovski® 4300 8x4.8mm
- 10** 1 Alacarte Clasps™ Teardrop
- 11** 4 2mm (tiny) crimps

**SUPPLIES NEEDED:**

- 1** epoxy, 2-part, 5 minute clear drying (can be longer dry time)
